KMSAuto Net 2015 Keymaker & Activator is one of the best activators available for Microsoft Windows OS. It has many features that can help people activate their software, drivers, and even video games. This latest release offers genuine activation for all editions of Windows 8.1 and Windows 10, including Enterprise editions. It supports your current Microsoft account without having to use any other account credentials during the activation process. This Activator also allows you to create an unlimited number of activations, meaning that the number of times you activate your software is limited only by the number of activations you have created. KMSAuto Net 2015 Keymaker & Activator has a very simple interface that will let everyone use it easily. It also comes with a back-up feature that will make sure your keys are stored in case something goes wrong during the process. This feature is certainly very important since there are no manual backups. If you make any changes to your PC, they will be lost once you start this application without finishing all the steps required for activation.

1) Download and install KMSAuto 2015 V1.4. 2 portable. 2) Click on your name in the top right to get your activation key. 3) Click the red text to get to the activator. It will start without an internet connection.

Changes in 1.4.2 - 2016-08-14
